

PREVENTT

Preoperative intravenous iron to treat anaemia in major surgery

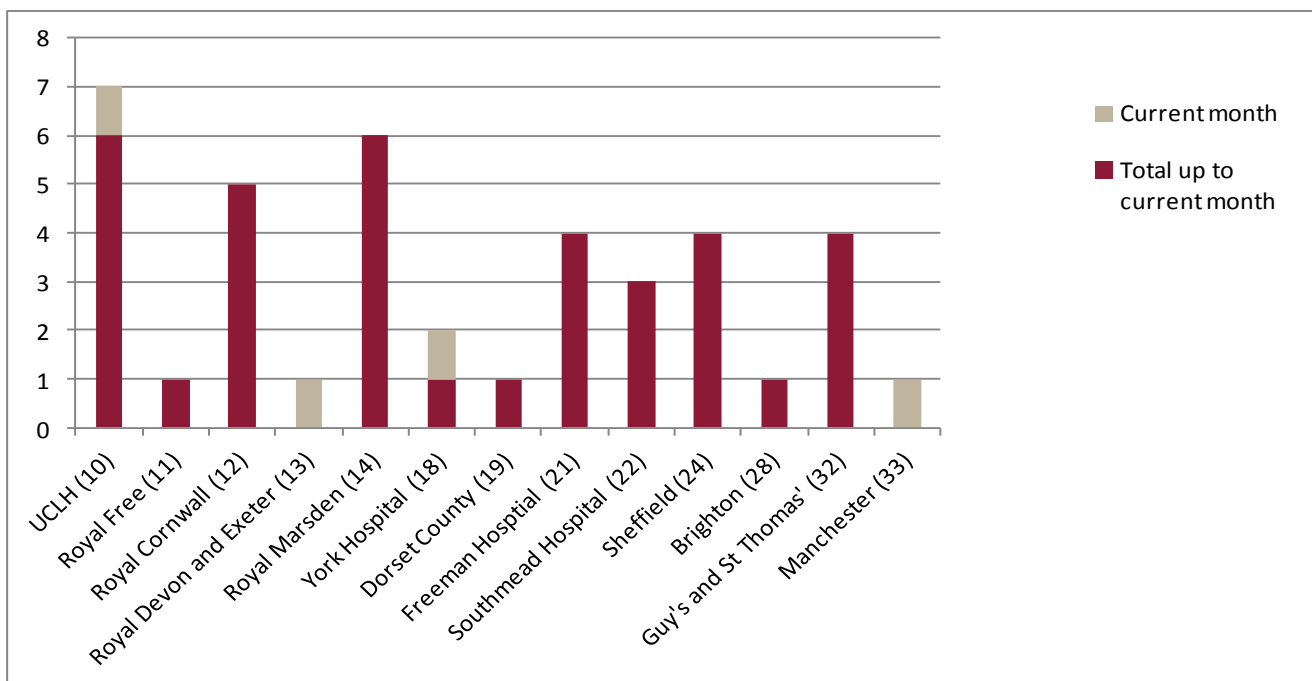

Issue 11
August 2014

PREVENTT News

Welcome to the latest edition of the PREVENTT newsletter. During July, our 19th site Morrision Hospital opened to recruitment. Approval has also been received for amendment 3 which included the change of PI at several sites and the addition of some new PREVENTT centres. Set up has now started at James Cook Hospital, Broomfield Hospital, Royal Liverpool, Salford Royal, Wye Valley, Northampton General and Coventry. Over the next few months the PREVENTT team looks forward to working with you all as we work towards the target of 30 PREVENTT sites.

Finally, the next two PREVENTT sites have now recruited their first patients, congratulations the teams at Central Manchester and the Royal Devon and Exeter.

PREVENTT Recruitment– 40 Patients Randomised!

Remember to keep screening regularly for PREVENTT. It can be important to keep an eye on surgical lists and MDT outcomes. At several sites, contacting patients in advance by phone has helped with recruitment. If you have any questions about the eligibility of any potential patients then please contact the PREVENTT CTU for further information.

Have a safe and lovely summer! The PREVENTT newsletter will return to the normal two page update in September.
